

ENESSCO INTERNATIONAL

**ELIMINATE THE HIGH COST OF WAX AND STICKIES PROBLEMS
FOR LESS THAN \$2.50 PER TON OF PRODUCTION!**

**REDUCE DOWNTIME & BREAKS
REDUCE BUILDUP & WASHUPS
IMPROVE SHEET APPEARANCE
REDUCE DOWNGRADED PRODUCTION
FASTER MACHINE SPEEDS
INCREASE SHEET STRENGTH
MORE PRODUCTION**

Enessco produces a more "virgin like" furnish by enhancing the amount of wax and stickies removed in your existing screening and cleaning system.

Enessco works EVERY TIME!!! We will prove it with a no work - no pay site trial. This environmentally friendly patented chemistry modifies contaminants to be more efficiently removed from the incoming recycle furnish as well as preventing cycle-up in the mill's internal white water loop; thus reducing system contaminant loading and subsequent PM system deposition. **It's that simple!**

Brown grades, Tissue, DeInked Pulp or News:

Enessco has proved itself:

- 3% to 10% increased production
- Reduced dirt / sticky counts
- reduced antiskid usage
- elimination of TDU's (Thermal Dispersion Units)
- increased yield by up to 2%
- 30 to 70% downtime reduction (breaks, washups, etc.)
- replacement of strength additives & deposit control chemistry
